

4075RLA®

PREMIUM GRADE PREMASK WITH RELEASE LINER ADHESION TECHNOLOGY

BACKING

A heavyweight saturated paper with higher elongation, resistance to abrasion and moisture, with greater conformability to facilitate placement and transfer of small and large graphics.

ADHESIVE

A natural rubber adhesive with higher tack levels to achieve more consistent transfer of computerized vinyl graphics regardless of size and type. The stable adhesive system permits longer time periods between application of the tape and the actual transfer.

R TAPE RELEASE LINER ADHESION (RLA™) PERFORMANCE FEATURES

R Tape Premasks upgraded with RLA™ technology have improved adhesion to paper or film release liners, yet maintain the specified adhesion level to the vinyl or printed graphic. R Tape RLA™ Premasks anchor themselves to the release liner for superior lay flat to prevent tunneling and edge curling of stacked or rolled graphics.

APPLICATIONS

High adhesion level combined with the high tensile, elongation and tear resistant paper provides the sign maker and decal manufacturer with the best possible combination of application tape and pre-space tape. Plus, the ability to store or roll finished graphics without the lifting or tunneling of tape from liner.
